Technical Material Data

	Perfalit 1.67	ColorMatic® 1.67 brown, grey
n_e	1.668	1.668
Abbe No.	31.4	31.4
Density v_e	1.37 g/cm ³	1.37 g/cm ³

Without “Unique Customization”

High minus prescriptions incorporated into standard lens designs result in severely compromised zones.

Impression® Myop

Myop is designed only AFTER the prescription and optional individual data is entered into Rodenstock’s “UNIQUE CUSTOMIZATION” software resulting in an unmatched reduction in distortion at these powers.

Delivery Range

Diameter	Sphere (D) in the main meridian
65	-4.25 to -14.00
60	-14.25 to -17.00
Addition	+0.75 to +3.00
Cylinder	up to 6.0 D
Prism up to 5 Δ, where technically possible
